References Becker (6,738,435), Rabii (6,304,136), Lim (5,144,256), Dillman (4,910,465), and Iemura (2001/0009574) are cited because they are pertinent to the FSK receiver. However, none of the cited references teaches or suggests, in combination, the arrangements of first means for receiving a scaled I signal and a scaled Q signal and determining the absolute value thereof to yield an absolute scaled I signal and an absolute scaled Q signal; an arctan lookup table (LUT) for outputting a first phase value in accordance with each absolute scaled I signal and absolute scaled Q signal pair; and second means for generating a delta phase value in accordance with said first phase value and a previous first phase value delayed one symbol time in order to form a differential detector for use in a digital frequency shift keying (FSK) receiver as recited in claims 1 and 21 and corresponding method claim 12 and further limitations of their respective dependent claims 2-11, 22-29 and 13-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
